FREQUENTLY ASKED QUESTIONS

What grade of anchor bolt do I need?

For general structural anchoring, ASTM F1554 Grade 36 (or Q235/Grade 4.6) is common; higher loads use Grade 55 or 105 / class 8.8. Provide your load or drawing and we will match the grade and thread.

Do anchor bolts come with nuts and washers?

Yes. We supply complete anchor bolt sets with matched hex nuts and washers, and can add a second nut for double-nut leveling if required.

FACTORY-BACKED SUPPLY
