REBAR SUPPORTS CHAIRS

WIRE BAR CHAIRS

Wire supports that set exact rebar cover

Wire bar chairs hold reinforcing bar at the specified height so concrete cover is maintained. Leeter manufactures individual high chairs, bar chairs and continuous chairs in galvanized, plain or plastic-tipped finish at standard cover heights.

FREQUENTLY ASKED QUESTIONS

How do I choose rebar chair height?

Chair height equals the concrete cover your drawings specify below the bar. For example a slab needing 1" cover uses a 1" chair. We supply a full range of standard heights and custom sizes.

What are plastic-tipped bar chairs for?

The plastic tips sit against the formwork so the steel wire does not touch the form face — this prevents rust staining on exposed concrete and protects the form surface.

FACTORY-BACKED SUPPLY
